## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-8, 17-33, 43-51, and 70-81 are allowed.

### *Drawings*

2. Claims are allowed. Formal drawings are required in response to this action.

### *Reasons for Allowance*

3. The following is an examiner's statement of reasons for allowance:

The closest prior art of record issued to Jain and Wang fails to teach or suggest *a system and a method for redirecting an incoming call prior to establishing a communication connection between an originator of the incoming call and the data processing system with an option for the user or the received party of the incoming call to redirect it instead of the system as cited in claims 1, 17, 25, and 43*. Jain discloses a multicasting system with a conventional forwarding technique of messages using pre-stored numbers or alternate numbers as normally used in a personal location service; and Wang shows a closer technique of giving the users options to redirect the call. However, Wang requires that call transferring can only be performed with already established communication connections between an originator of the call and the palm-size device (Figs. 18-19, col. 36/line 10 to col. 37/line 11). The present invention discloses the amended languages that "responsive to receiving the registration notice, providing a user with an option to redirect the routing of the call prior to establishing a communication connection between an originator of the incoming call and the data processing system" and wherein the user

Art Unit: 2685

input identifies a new address of another device, instead of the data processing system, to which the incoming call is forwarding to.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
